

Raspberry substrates

The specialist in **specialty fertilizers**

Fruit production Substrates

Fruit production substrates
Mixing in the substrate or topdressing.

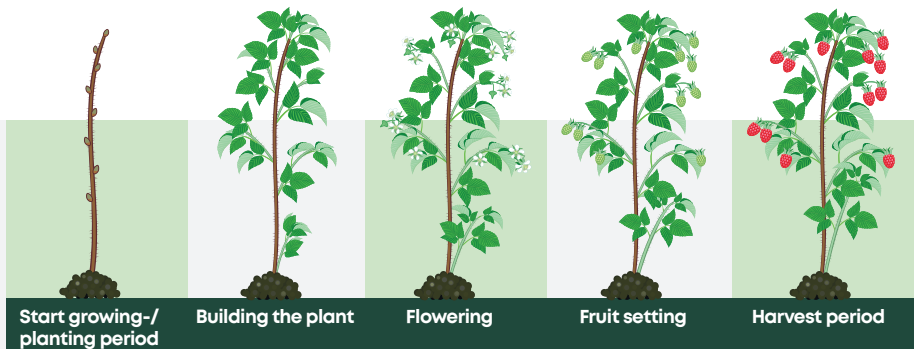

Horti-Cote® Plus CRF

Controlled Release Fertilizer

16+6+11+2MgO+TE 4-6M

1-2 kg / m³

Contains:

		Start growing-/ planting period	Building the plant	Flowering	Fruit setting	Harvest period
Granusol®WSF Water Soluble Fertilizer	GREEN (N :K 1:1)	20-40 kg/ha/wk *drip EC mS/cm 0,8	60-80 kg/ha/wk *drip EC mS/cm 1,6			
Granusol®WSF Water Soluble Fertilizer	GREEN – RED (N :K 1:2)			80-100 kg/ha/wk *drip EC mS/ cm 1,6 - 1,8	100-120 kg/ha/wk *drip EC mS/cm 1,8	
Granusol®WSF Water Soluble Fertilizer	RED – BLUE (N :K 1:2/3)					100-120 kg/ha/wk *drip EC mS/cm 1,8
Granusol®WSF Water Soluble Fertilizer	Micro High MgO			1-2 kg/ha/wk	1-2 kg/ha/wk	1-2 kg/ha/wk

* Total drip EC based on water EC of 0,4 mS/cm.

Fertigation schedule Substrates.

Before and during cultivation manage nutrition levels with drip- drain- substrate- analyses. Nutrition levels depends on plant period, plant stadium, plant variety, soil type, climate and water management.

High carbonate levels need to be neutralised with acid. Do not mix Granusol WSF calcium products with Granusol WSF products without calcium in one tank.
